

## T4 - MACHINES THERMIQUES

### Pompe à Chaleur : TP TD

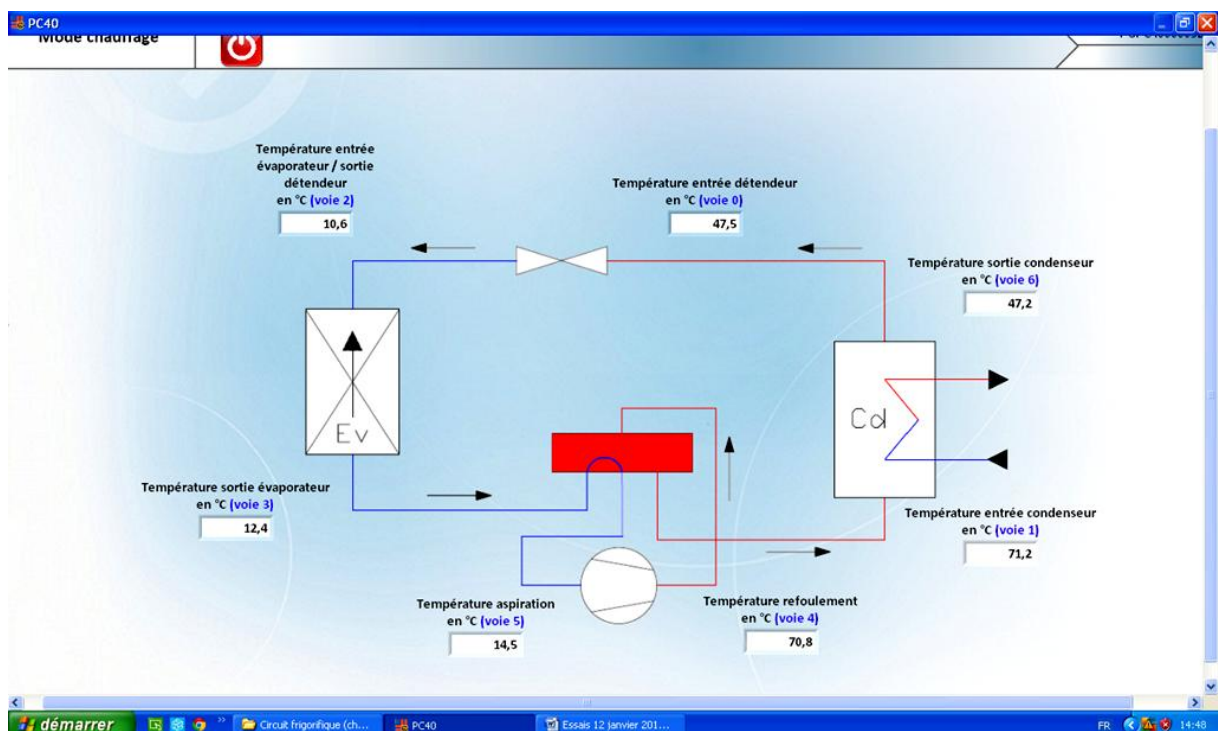

Synoptique de la PAC :

Mesures :

Basse Pression : 10 bars

Haute Pression : 30 bars

- 1) Tracer le cycle thermodynamique de la PAC sur le diagramme des frigorigènes ( $\ln P, h$ ) page 3.
- 2) Tracer le cycle thermodynamique de la PAC sur le diagramme ( $T, s$ ) page 4.
- 3) A partir du diagramme des frigorigènes, calculer le  $COP_{réel}$  de la PAC.
- 4) Comparer au  $COP_{max}$  (efficacité de Carnot) d'une PAC idéale.

**Fiche technique du fluide R410 A :**
