

# Oral Presentation: March 13th

> Imagine you are **a team of 3 scientists** working on de-extinction and **choose a species** you would like to resurrect. In order to gather fundings for your project, **imagine a catchy five-minute-long presentation** to convince the European Research Area (ERA) to finance you.

# Use the IMRAD method

INTRODUCTION: Provide **details** on the species to introduce it to your audience and show the tragedy of their extinction

METHOD: Explain the **technical aspects** of your project  
(Back-breeding, cloning, something else?)

RESEARCH: Go through the potential **knowledge** you will collect  
(about the species itself, its environment or interaction with other species)

AND DEVELOPMENT: List the potential other **benefits** to be reaped from your findings (as food, means of transportation, pet...)

# Assessing scheme

CONTENT AND STRUCTURE	5pts
SYNTAX AND VOCABULARY	5pts
PRONUNCIATION AND CLARITY	5pts
QUALITY OF THE PRESENTATION AND INTERACTION	5pts
