

# Let's debate!

*Should CRISPR cas9 be used to edit human genes?*

Prepare your case in small groups

- > One minute to present your main thesis
- > One more minute to explain each argument
- > Imagine the counter-arguments to be ready to answer them

# Let's debate!

*Should CRISPR cas9 be used to edit human genes?*

Group 1: YES - Main thesis

>

Group 2: NO - Main thesis

Group 1: Concession + Rebuttal

>

Group 2: Concession + Rebuttal

Group 1: Concession + Rebuttal

>

Group 2: Concession + Rebuttal

# *Should CRISPR cas9 be used to edit human genes?*

Assess your own work: /4

- Did you manage to explain all your arguments clearly? /2
- Did you offer convincing counter-arguments? /1
- Did everyone participate as much in the group? /1

Assess your opponent's work: /1

- Were you (partly) convinced by their case?
