

Recap: Fill in the blanks to complete a text summarizing last week's topic.

AI is a never-ending source of debates, anxieties and conflicting narratives.

Though the expression was first coined in ..... to refer to ... ..... based on the hypothesis that all ..... could, eventually, be ..... by ....., it has gained wide popularity since. So much so that it can lead to misunderstandings. Indeed, the expression conjures up images of artificial entities ..... human-like intelligence. But in reality, AI cannot actually do all the things we sometimes imagine or fear it might do.

For instance, using GPT could lead some to believe that they are interacting with an all-..... machine, and it has also convinced at least one man that it had ... .., when in fact it only produces text it deems ..... based on ....., so that it has no deep ..... of any subject, nor the ability to generate any ..... Idea.

The public should bear in mind that ..... scenarios are surely ....., whereas ..... such as breaches of ..... and ..... to democracy should be taken seriously and addressed by ..... and ..... alike.

Document: "AI can do your homework. Now what?" by VOX, 2023

> Select an example of **use** and an example of **misuse** from the list. Justify your choice.

|          |  |   |
|----------|--|---|
| Research | Answers to a homework question<br>Background information on a topic<br>Definition or explanations of a concept | Sources to find more information<br>Summaries of reading and lectures<br>Study guides for an exam |
| Ideas    | Ideas for how to respond to an assignment<br>Instructions for solving a problem                                | Outline for a paper or presentation<br>Examples, analogies, and counterarguments                  |
| Writing  | A draft of a paper or discussion post<br>Script for a presentation   | Feedback on their work<br>Revision of text to improve it<br>Revision of text to change word count |

Document: audio adaptation of "AI cheating is overwhelming the education system – but teachers shouldn't despair", by John Naughton, *The Guardian*, August 2024

> Match each expression with the accurate synonym or definition

- an LLM (= L..... L..... M.....) - to assess a student's work
- to grade - an overlaid marking (French: *filigrane*)
- an arms race - a chatbot
- a watermark - the latest stage in technological progress
- state of the art - fast-paced development and implementation of new tools
