- **THESIS (problématique) :**

How can the lack of restrictions on gun use in the US be accounted for and what does the future hold in store ?

With the number of killings on the rise, why, paradoxically, does it look so unrealistic to envisage more restrictive measures on firearms?

This dossier shows that, paradoxically, although the number of mass shootings is on the rise, adopting stricter laws on firearms will not be a piece of cake.

- **CONCLUSION**

In short, supporters of gun control have reasons to believe that all hope is not lost, but the scope of the problem and the deeply-rooted gun culture suggest this will remain an uphill battle.

- **PLAN**

- 1. FACTS**

More and more shootings in the US over the past years

- 1,600 since Biden was elected (Doc2)
- more between 2015 & 2022 than between 2000 & 2015 (Doc4)
- rise in the number of school shootings (Uvalde, Parkland) (Doc3)
- Still, many Americans still support the right to bear weapons (Doc5)

- 2. WHAT STOPS / HINDERS REGULATION**

- many inadequate solutions (religion, man traps, blankets) → ridiculous (Doc3)
- NRA : supporting the idea of more police officers in schools (Doc3)
- Idea that more guns are needed to solve the gun problem in America (Doc3) → that is why some Fairy Tales are being rewritten (Doc1)
- Gun culture in America is deeply entrenched (Doc5)
- Doc 4 : the easy access to guns doesn't always mean a rise in mass shootings
- No ground for optimism (Doc2)

- 3. PROSPECTS**

- Anti-gun activists are fighting against this “degenerate culture” that puts children’s lives at risk (Doc1)
- Doc 3 : children need medical or mental health professionals rather than police officers at school
- But anti-gun activists have to face the intense lobbying of the NRA (Doc 1)
- The obvious solution is gun control (Doc3). President Biden believes he can make things change (Doc2) but he needs to be supported by Congress, which is a long shot , and time is not on his side (Doc2).

For now, although all hope is not lost (Doc2), it looks like achieving real progress in terms of gun control is a daunting task/ an uphill struggle
