

2. What is your opinion on Stephen Hawking's statement: "the development of full artificial intelligence could spell the end of the human race"? Support your arguments with examples. (180 words $\pm 10\%$)

2. What is your opinion on Stephen Hawking's statement: "the development of full artificial intelligence could spell the end of the human race"? Support your arguments with examples. (180 words $\pm 10\%$)

~~≠~~ The pros and cons of AI

~~≠~~ The pros and cons of robots

~~≠~~ Is AI good or bad?

~~≠~~ Is AI a threat?

2. What is **your opinion** on Stephen Hawking's statement: "the development of full artificial intelligence could spell the end of the human race"? Support your arguments with examples. (180 words $\pm 10\%$)

2. What is **your opinion** on Stephen Hawking's statement: "the development of **full artificial intelligence** could spell the end of the human race"? Support your arguments with examples. (180 words $\pm 10\%$)

2. What is your opinion on Stephen Hawking's statement: "the development of full artificial intelligence could spell the end of the human race"? Support your arguments with examples. (180 words $\pm 10\%$)

2. What is **your opinion** on Stephen Hawking's statement: "the development of **full artificial intelligence** **could** **spell the end of the human race**"? Support your arguments with examples. (180 words $\pm 10\%$)

STEPHEN HAWKING

/sti:vən hɔ:kɪŋ/

- Prendre position / répondre à la question posée

- It depends 
- He may be right. 
- It is positive but we shouldn't abuse it 
- We have to be careful 

POSSIBLE ANSWERS

It could, but it won't.

Not only is it possible, but I'm certain it will happen.

It may be a threat, but it won't lead to the end of humanity.

It is not AI that will spell the end of the human race.

ORGANIZING YOUR IDEAS

Intelligent robots could start a war. Moreover, students use chat GPT to write essays.

- Students use chat GPT and that is cheating 🤔??

- As students increasingly use chat GPT, they use their brains less and less. If humans become less intelligent while machines are becoming more intelligent, this could lead to the downfall of humanity.

- AI can be used in medicine or to explore the universe . 🤔??
 - AI can be used in medicine and save more lives, which means preserving the human race.
 - AI helps human to explore the universe, which could help them find new resources or even new places to live, thus preserving the human race.

Write a two-sentence introduction

Find a plan (Two parts / one example in each)

CONSIGNES

Une **phrase de contextualisation** efficace est attendue, suivie d'une **reformulation de la question** et d'une argumentation solide permettant au candidat de se prononcer. Tout plan passe-partout est exclu, au même titre que la réutilisation des arguments du texte. **L'annonce de plan est inutile**, et le nombre de mots, 180 +/- 10%, ne permet guère plus de **deux parties**.

AI has grown considerably in recent years. Many prominent people, including Stephen Hawking, have voiced concerns about it. But whether it can actually cause the end of the human race remains to be seen.

On the face of it there is every reason to worry. Autonomous weapons able to make life-or-death decisions without human intervention have been developed for a few years. And when I see that in July 2026 an Open AI model hacked a real company without being instructed to, I cannot help but fear that the worst loss-of-control sci-fi scenarios may become reality some day.

Yet, there is no denying that AI is also an incredible tool that can prevent human downfall. AI models are already being used to optimize renewable energy networks and accelerate medical breakthroughs. For instance, AI is inventing new drugs against Parkinson's disease, antibiotic-resistant superbugs and many rare diseases, many scientists would never have dreamed possible.

In short, the true danger does not come from the evil behavior of machines, but from how humans choose to use or neglect these systems. I believe that it is not artificial intelligence but human intelligence that may lead to the extinction of humans.
