Capital punishment was abolished in Britain in 1969 and in France in 1981. In Europe, where abolition of capital punishment is a condition of membership of both the European Union and the Council of Europe, Belarus (*la Biélorussie*) is the only country that still uses it. Singapore, Japan and the U.S. are the only developed countries that have kept the death penalty. But in the US, only 30 states use it. In 2019, California's governor announced a moratorium on capital punishment.

Since World War II, there has been a worldwide trend towards abolishing capital punishment: in 2018, only 20 countries were known to have carried out executions. China

carries out by far the greatest number: several thousand every year, as against 20 to 25 in the USA in the past few years. Iran, Iraq, Saudi Arabia, Yemen, Sudan, Afghanistan still enforce it too. In the United States, where about 2,743 prisoners were on death row in 2018, public support for the death penalty is dwindling.

The United States executed 25 people in 2018, and over 2,700 prisoners remain on death row. It is one of only 56 nations in the world that still practice capital punishment... Should the United States as a country stop using the death penalty? Is it ever justified, such as for the most heinous (*odieux*) crimes? Or do you think it is always cruel and unusual punishment? Alternatively, do you think it should be suspended for practical reasons, such as because it is costly or sometimes unfairly administered?

Article 5 of the **Universal Declaration of Human Rights**—adopted by the United Nations General Assembly on 10 December 1948—states that “No one shall be subjected to torture or to cruel, inhuman or degrading treatment or punishment.” This is the basis often invoked to justify the abolition of capital punishment.

The states considering abolition, including Colorado, Kansas, New Mexico and New Hampshire, have shifted (*déplacé*) the debate about capital punishment, at least in part, from morality to cost. Studies show that administering the death penalty is even more expensive than keeping someone in prison for life [...] A recent study by the Urban Institute, a think-tank (*groupe de réflexion*), estimates that the death penalty cost Maryland's taxpayers \$186m between 1978 and 1999. According to the report, a case resulting in a death sentence cost \$3m, almost \$2m more than when the death penalty was not sought.

**The Stoning of Soraya M.** is a 2009 film adapted from French-Iranian journalist Freidoune Sahebjam's 1994 novel of the same name. The book tells the true story of one of the victims of stonings (*lapidations*) in modern Iran. Soraya M.'s husband wanted out of his marriage. When Soraya began cooking for the widowed husband of a friend, he found his excuse. Abetted (*soutenu*) by village authorities and aided by a skewed (*biaisée*) interpretation of Islamic law, he accused his wife of adultery. She was taken away, buried (*enterrer*) up to her shoulders and neck in the ground, and then stoned to death.
