● WITH + groupe nominal

With the world set to face 1.5 environmental disasters a day (or 560 per year) by 2030, the rapid developments in our climate call for equally agile tools that can aid society in improving its disaster preparedness and response capabilities. In light of this pressing need, early warning systems (EWS) have emerged as a critical solution that is being increasingly adopted around the world as a means of mitigating the devastating impacts of natural and man-made disasters. These disaster prediction information tools can be used across various types of extreme weather events such as floods, heatwaves, tsunamis, and tropical cyclones.

WITH the presidential election just over 100 days **AWAY**, the Democratic Party is on a tight schedule. It should not be used as a pretext for a hasty nomination. The Republican Party, spectacularly strengthened both by the assassination attempt on Trump, on July 13, and by a successful inaugural convention, would immediately denounce the move as a ploy to manipulate the political machinery.

Le Monde, 22/07/2024.

WITH just a few weeks **LEFT** before this campaign ends, the rest of the world has an idea of what to expect from a Trump presidency. But it's just as true that the rest of the world – including Mr Trump himself – knows very little about Ms Harris will do if she ends up becoming the first female president in American history.
