

Exercice 2

$$\vec{u} = +\cos(\alpha) \vec{e}_y + \sin(\alpha) \vec{e}_x$$

$$\vec{u} = \cos(\alpha) \vec{e}_x + \sin(\alpha) \vec{e}_y$$

$$\vec{u} = -\cos(\alpha) \vec{e}_x + \sin(\alpha) \vec{e}_y$$

d) - Configuration identique. Cela ne dépend pas du point d'application.
